- **"No active request" Rules**
- If no response from PI when HET offspring are T(2,9,3,3,1)MTH old they are put into breeding.
- Herd "culling" based on # of parent litters generated and each litter's size. Litter generations with smallest size culled first. A range of 2-4 litters will be kept.
- Projects can wait a 2nd T(4,5,6) Mths for PI response.
- If a project stays in development for 2nd response then 80% go into production & 20% are terminated.
