

While working at Jackson Lumber in 2021, I volunteered by providing plant waste to local high school art programs. Jennifer Levantino, art department chair at Winchester Middle School, was happy to receive it. Lumber materials remain super expensive, and businesses with this kind of material should, at the very least, provide a pick pile.

- Giant cardboard, such as 4' x 4' or 4' x 8'.
- Discarded supersize quality plastic for use as tarps, etc.
- Fancy molding of all sorts like Windsor, crown, astragal, scotia, chair-rail.
- Quality wood cutoffs, including cedar for carving. Very expensive!
- Industrial paints with deep pigments.

Trash to Treasure Evidence
Performed: 12/20-9/21

Given the massive increase in materials I am confident you will find this particular shipment amazing

Thanks Brian! Perfect timing on all Counts. We are probably well stocked thanks to you for a while. School ends on a couple of weeks but we now have so many great materials to look forward to working with in the fall. Can't thank you enough for your continued support- you're a true friend of the Art(s) Department!!
