Humayun Khan
Enterprise Security Manager / hhkhan@syr.edu 11/10/2021

I know Brian Hogan since the Fall of 2019 when he was a student in the BI & Data Warehouse class I teach at Syracuse University. Brian was one of the top students in my class and never missed a day.

Always punctual and ready with answers, he demonstrated speed and skill at learning. Challenged with a Merger & Acquisition project, he led his team with passion and commitment, combining ETL skills with Data Analytics, and coming up with a well-thought Power BI presentation and technical writeup, that analyzes sales of products from the one company along with subscription billings in the other.

He (and his team) also modeled the supply chain to analyze the order fulfillment for the products, accurately predicting the need for locating distribution centers.

Armed with additional knowledge from advanced courses in the Data Science program and his own work experiences, Brian is fiercely determined to succeed.

He also involves himself in academic research opportunities and in volunteer work, looking for ways to help in waste reduction and personal health causes. I believe he will be a strong contributor in any organization that hires him. I wish him the best in his ongoing career pursuits.
